

Environmental Policy

Considering the purpose and context of the organization, and the condition of the environment in which the company operates, the management of Pacific Coast Produce is committed to the continual improvement of the Environmental Management System (EMS), according to compliance obligations, by following the principles and requirements of ISO 14001:2015.

We are committed to meeting the requirements of Freshcare Food Safety 4.1, HARPS, ISO 14001:2015 requirements, Ecoganic Protocol and relevant legislative requirement, to ensure we safeguard the natural environment in which our business operates. We have developed an Environmental Action Plan to help guide continual improvements to environmental activities and initiatives planned for our business, and we will review this Commitment Statement annually in conjunction with the Environmental Action Plan

Our vision and goals have been to and continue to create and support sustainable production systems and sustainable marketing systems – which are important for farmers. The *Ecoganic protocol is about using innovative farming techniques, while harnessing and utilising the Earth's natural capital to help us unlock nature's secrets.*

Our goal is to be identified in the market place as a supplier of ecologically sound produce that has been grown within the framework of the Ecoganic Farming Protocol and the Environmental management system ISO 14001:2015.

The framework for setting environmental objectives is defined in the Environmental Manual.

All management and employees of Eco Bananas are acting to protect the environment by preventing and eliminating environmental pollution through:

- Continual education in order to prevent environmental pollution, preserve natural resources, and improve the EMS
- Continual raising of environmental awareness
- Exploration of new materials with smaller environmental footprints
- Decrease of nonrenewable energy consumption and replacement with renewable energy sources
- Activities that emerge from the context of the organization
- Following environmental procedures in order to decrease environmental pollution, and prevent degradation and damage to the environment
- Decrease of adverse impact on water, soil, air, and biodiversity.

The Farm Manager is responsible for communicating the Environmental Policy to all persons working for or on behalf of the organization and making it available to the public.
